Matrix isolation FTIR and ab initio study of complexes between formic acid and nitrogen, J. Lundell, M. Räsänen and Z. Latajka 189 (1994) 245
Adiabatic approximation and non-adiabatic effects for open-shell atoms in an inert solvent: F atoms in solid Kr, A.I. Krylov, R.B. Gerber and V.A. Apkarian 189 (1994) 261
Magnetic field dependent yield of geminate radical pair recombination in micelles. Test of the Johnson–Merrifield approximation, J.B. Pedersen, A.I. Shushin and J.S. Jørgensen 189 (1994) 479
Three-dimensional wavepacket study of the reaction $OH+H_2 \rightarrow H_2O+H$: a mixed quantal/classical approach, N. Balakrishnan and G.D. Billing 189 (1994) 499
Evaluation of the hydrophilic behaviour of a β-casein peptide by molecular dynamics simulation, C.X. Wang, R. Douillard and V. Tran 189 (1994) 511
Quantum corrections to the classical path equations: the higher order correction terms, G.D. Billing 189 (1994) 523
Molecular geometries and energetics of metal-containing systems using an improved ASED-MO model: a systematic test to group 1 and 2 metal containing systems in the gas phase, M.-A.D. Stiakaki, A.C. Tsipis, C.A. Tsipis and C.E. Xanthopoulos 189 (1994) 533
Molecular geometries and energetics of mono- and biligated group 2 metal monopositive ions using an improved ASED-MO model, E.G. Bakalbassis and C.A. Tsipis 189 (1994) 557
Multicentric charges for the accurate representation of electrostatic interactions in force-field calculations for small molecules, C. Alemán, M. Orozco and F.J. Luque 189 (1994) 573
Ordering of transition metal atoms in $MCuFeS_2$ (M=Li, Na): electronic structure and Monte Carlo simulations, R. Ramirez, A. Buljan, J.C. Noya and J. Llanos 189 (1994) 585
Intensity distribution in the fluorescence low-frequency mode progressions of the "slightly" asymmetric hydrogen bonded AHB fragment, M.V. Vener 189 (1994) 593

Molecular dynamics and scattering theory

Influence of the radiation field onto the photodissociation, M. Rosenberger and J. Hinze 189 (1994) 41
Vibrational analysis of low-lying K-shell excited states in H_2O and D_2O calculated by an ab initio multireference CI method, A. Koch and S.D. Peyerimhoff 189 (1994) 67
Adiabatic approximation and non-adiabatic effects for open-shell atoms in an inert solvent: F atoms in solid Kr, A.I. Krylov, R.B. Gerber and V.A. Apkarian 189 (1994) 261

Three-dimensional wavepacket study of the reaction $OH+H_2 \rightarrow H_2O+H$: a mixed quantal/classical approach, N. Balakrishnan and G.D. Billing 189 (1994) 499
Evaluation of the hydrophilic behaviour of a β-casein peptide by molecular dynamics simulation, C.X. Wang, R. Douillard and V. Tran 189 (1994) 511
Quantum corrections to the classical path equations: the higher order correction terms, G.D. Billing 189 (1994) 523
Probabilities of rotational transitions under ionization into N_2^+ ($B\,^2\Sigma_u^+$, $v'=0$) state by electron impact, G.I. Sukhinin, R.G. Sharafutdinov, A.E. Belikov and A.I. Sedelnikov 189 (1994) 603
Computation of time-dependent transition probabilities in excimer molecules induced by femtosecond laser pulses, I.D. Petsalakis, T. Mercouris and C.A. Nicolaides 189 (1994) 615
A reaction-path dynamics approach to the thermal unimolecular decomposition of acetaldoxime, K. Okada, M. Sugimoto and K. Saito 189 (1994) 629
Microcanonical rate constant in nonequilibrium distribution of vibrational energy on the basis of Slater's theory of unimolecular reactions, A. Metsala 189 (1994) 637
A theoretical model of laser-control photodissociation of molecules, J.C. Vallet, A.A. Villaeys, J.P. Lavoine and S.H. Lin 189 (1994) 657
Product energy distributions and angular momentum disposal in heavy–heavy–light reactions via the CPOAM model, M. Albertí, X. Giménez and A. Aguilar 189 (1994) 677

Experimental

Magnetic resonances

ESR spectra, structure and photochemistry of carboxylic acid and ester anions: matrix isolation study, R. Köppe and P.H. Kasai 189 (1994) 401
Electron spin resonance in PPV-photodiodes: detection via photoinduced current, V. Dyakonov, N. Gauss, G. Rösler, S. Karg, W. Riess and M. Schwoerer 189 (1994) 687
Surface diffusion of the cyclohexadienyl radical adsorbed on silica and on a silica supported Pd catalyst studied by means of ALC-μSR, M. Schwager, H. Dilger, E. Roduner, I.D. Reid, P.W. Percival and A. Baiker 189 (1994) 697

Infrared spectroscopy

The vibrational energy levels of small transient molecules isolated in neon and argon matrices, M.E. Jacox 189 (1994) 149
Matrix isolated HF: the high-resolution infrared spectrum of a cryogenically solvated hindered rotor, D.T. Anderson and J.S. Winn 189 (1994) 171
Matrix isolation FTIR and ab initio study of complexes between formic acid and nitrogen, J. Lundell, M. Räsänen and Z. Latajka 189 (1994) 245
Photogeneration of ionic species in Ar, Kr and Xe matrices doped with HCl, HBr and HI, H.M. Kunttu and J.A. Seetula 189 (1994) 273
O atom photoproduction dynamics and reactions in cryogenic solids, E.T. Ryan and E. Weitz 189 (1994) 293
Photolysis of ozone and reactions of $O(^1D)$ atoms in solid nitrogen, A.V. Benderskii and C.A. Wight 189 (1994) 307
Reactions of pulsed-laser evaporated lithium atoms with O_2 and N_2O, L. Andrews, W. Saffell and J.T. Yustein 189 (1994) 343
Detection of trimethylenemethane by IR spectroscopy: result of the photoisomerization of methylenecyclopropane in a halogen-doped xenon matrix, G. Maier, D. Jürgen, R. Tross, H.P. Reisenauer, B.A. Hess Jr. and L.J. Schaad 189 (1994) 383

Visible and UV spectroscopy
Structure and optical absorption of oligorylenes upon doping, S. Karabunarliev, L. Gherghel, K.-H. Koch and M. Baumgarten 189 (1994) 53
Vibronic relaxation dynamics of CN in Ar matrices and clusters, H.-S. Lin, M.G. Erickson, Y. Lin, W.H. Basinger, W.G. Lawrence and M.C. Heaven 189 (1994) 235
Rare gas matrix studies of absorption and fluorescence of reactive intermediates formed in discharges through acetylene, A.M. Smith, J. Agreiter, M. Härtle, C. Engel and V.E. Bondybey 189 (1994) 315
Absorption spectra of conjugated hydrocarbon cation chains in neon matrices, P. Freivogel, J. Fulara, D. Lessen, D. Forney and J.P. Maier 189 (1994) 335
Spectroscopy and reactive dynamics of atoms trapped in molecular hydrogen matrices, M.E. Fajardo, S. Tam, T.L. Thompson and M.E. Cordonnier 189 (1994) 351
Luminescence of nitrogen and neon atoms isolated in solid helium, R.E. Boltnev, E.B. Gordon, V.V. Khmelenko, I.N. Krushinskaya, M.V. Martynenko, A.A. Pelmenev, E.A. Popov and A.F. Shestakov 189 (1994) 367
Probabilities of rotational transitions under ionization into N_2^+ ($B\,^2\Sigma_u^+$, $v'=0$) state by electron impact, G.I. Sukhinin, R.G. Sharafutdinov, A.E. Belikov and A.I. Sedelnikov 189 (1994) 603
Dynamics of selected rovibronic eigenstates in the V system of carbon disulfide $^{12,13}CS_2$, H. Bitto, A. Ružičić and J.R. Huber 189 (1994) 713
Temperature dependent ultraviolet absorption cross sections of 1,3-butadiene and butadiyne, A. Fahr and A.K. Nayak 189 (1994) 725

Fluorescence spectroscopy
Excited state properties and deactivation pathways of 7-aminocoumarins, K. Rechthaler and G. Köhler 189 (1994) 99
Zero-phonon line as the foundation stone of high-resolution matrix spectroscopy, persistent spectral hole burning, single impurity molecule spectroscopy, K.K. Rebane 189 (1994) 139
Vibrational energy transfer from CO to O_2 in rare gas matrices. I. Vibrational excitation and relaxation of O_2 (X, v=4–20), A. Salloum and H. Dubost 189 (1994) 179
Vibronic spectra of the matrix-isolated van der Waals complexes $NH{\cdot}N_2$ and $NH{\cdot}CO$, M. Maas, Ch. Gross and U. Schurath 189 (1994) 217
Rare gas matrix studies of absorption and fluorescence of reactive intermediates formed in discharges through acetylene, A.M. Smith, J. Agreiter, M. Härtle, C. Engel and V.E. Bondybey 189 (1994) 315
Electronically induced defect formation in Xe-doped solid Kr, E.V. Savchenko, A.N. Ogurtsov, O.N. Grigorashchenko and S.A. Gubin 189 (1994) 415

Photoelectron and Auger spectroscopy
A theoretical study on the ionization of thiophene with analysis of vibrational structure of the photoelectron spectra, K. Takeshita and Y. Yamamoto 189 (1994) 489
Quantitative studies of the photoabsorption, photoionization, and ionic photofragmentation of methyl fluoride at VUV and soft X-ray energies (7–250 eV) using dipole electron scattering and synchrotron radiation, T.N. Olney, G. Cooper, W.F. Chan, G.R. Burton, C.E. Brion and K.H. Tan 189 (1994) 733

X-ray spectroscopy
Inner-shell spectroscopy of compounds containing Si–Si bonds: is there a localised, low-energy Si–Si resonance?, S.G. Urquhart, J.Z. Xiong, A.T. Wen, T.K. Sham, K.M. Baines, G.G.B. de Souza and A.P. Hitchcock 189 (1994) 757

Electron impact spectroscopy
Quantitative studies of the photoabsorption, photoionization, and ionic photofragmentation of methyl fluoride at VUV and soft X-ray energies (7–250 eV) using dipole electron scattering and synchrotron radiation, T.N. Olney, G. Cooper, W.F. Chan, G.R. Burton, C.E. Brion and K.H. Tan 189 (1994) 733
Selective detection of O(^{1}S) and CO(a $^3\Pi$) following electron impact on CO using solid xenon, L.R. LeClair, M.D. Brown and J.W. McConkey 189 (1994) 769

Laser methods
Vibrational energy transfer from CO to O_2 in rare gas matrices. I. Vibrational excitation and relaxation of O_2 (X, v=4–20), A. Salloum and H. Dubost 189 (1994) 179
Vibronic spectra of the matrix-isolated van der Waals complexes NH·N_2 and NH·CO, M. Maas, Ch. Gross and U. Schurath 189 (1994) 217
Photogeneration of ionic species in Ar, Kr and Xe matrices doped with HCl, HBr and HI, H.M. Kunttu and J.A. Seetula 189 (1994) 273
O atom photoproduction dynamics and reactions in cryogenic solids, E.T. Ryan and E. Weitz 189 (1994) 293
Rare gas matrix studies of absorption and fluorescence of reactive intermediates formed in discharges through acetylene, A.M. Smith, J. Agreiter, M. Härtle, C. Engel and V.E. Bondybey 189 (1994) 315
Reactions of pulsed-laser evaporated lithium atoms with O_2 and N_2O, L. Andrews, W. Saffell and J.T. Yustein 189 (1994) 343
Luminescence of nitrogen and neon atoms isolated in solid helium, R.E. Boltnev, E.B. Gordon, V.V. Khmelenko, I.N. Krushinskaya, M.V. Martynenko, A.A. Pelmenev, E.A. Popov and A.F. Shestakov 189 (1994) 367
Temperature dependence of the dipole polarizability of xenon ($^1S_0$) due to dynamic non-resonant Stark effect caused by black-body radiation, U. Hohm and U. Trümper 189 (1994) 443
Dynamics of selected rovibronic eigenstates in the V system of carbon disulfide $^{12,13}CS_2$, H. Bitto, A. Ružičić and J.R. Huber 189 (1994) 713
The vibrational deactivation of the (00^01) and (01^10). Modes of CO_2 measured down to 140 K, R.M. Siddles, G.J. Wilson and C.J.S.M. Simpson 189 (1994) 779
Temperature lens and temperature grating in aqueous solution, M. Terazima 189 (1994) 793

Synchrotron spectroscopies
Environmental effects on the energetics and photo-induced dynamics of molecular states, N. Schwentner, C. Bressler, W. Lawrence, J. Xu and M. Chergui 189 (1994) 205

Coherent optical spectroscopy
Zero-phonon line as the foundation stone of high-resolution matrix spectroscopy, persistent spectral hole burning, single impurity molecule spectroscopy, K.K. Rebane 189 (1994) 139
Environmental effects on the energetics and photo-induced dynamics of molecular states, N. Schwentner, C. Bressler, W. Lawrence, J. Xu and M. Chergui 189 (1994) 205

Optical pumping
The vibrational deactivation of the (00^01) and (01^10). Modes of CO_2 measured down to 140 K, R.M. Siddles, G.J. Wilson and C.J.S.M. Simpson 189 (1994) 779

Optoacoustic spectroscopy
Temperature lens and temperature grating in aqueous solution, M. Terazima 189 (1994) 793

Atomic and molecular beam techniques
Photofragmentation of chlorobenzene: translational energy distribution of the recoiling Cl fragment, T. Ichimura, Y. Mori, H. Shinohara and N. Nishi 189 (1994) 117
Probabilities of rotational transitions under ionization into N_2^+ ($B\,^2\Sigma_u^+$, $v'=0$) state by electron impact, G.I. Sukhinin, R.G. Sharafutdinov, A.E. Belikov and A.I. Sedelnikov 189 (1994) 603

Time-resolved experiments
Vibronic relaxation dynamics of CN in Ar matrices and clusters, H.-S. Lin, M.G. Erickson, Y. Lin, W.H. Basinger, W.G. Lawrence and M.C. Heaven 189 (1994) 235
Computation of time-dependent transition probabilities in excimer molecules induced by femtosecond laser pulses, I.D. Petsalakis, T. Mercouris and C.A. Nicolaides 189 (1994) 615
Dynamics of selected rovibronic eigenstates in the V system of carbon disulfide $^{12,13}CS_2$, H. Bitto, A. Ružičić and J.R. Huber 189 (1994) 713
Selective detection of $O(^1S)$ and $CO(a\,^3\Pi)$ following electron impact on CO using solid xenon, L.R. LeClair, M.D. Brown and J.W. McConkey 189 (1994) 769
The vibrational deactivation of the (00^01) and (01^10). Modes of CO_2 measured down to 140 K, R.M. Siddles, G.J. Wilson and C.J.S.M. Simpson 189 (1994) 779
Temperature lens and temperature grating in aqueous solution, M. Terazima 189 (1994) 793

Mass spectrometry
Photofragmentation of chlorobenzene: translational energy distribution of the recoiling Cl fragment, T. Ichimura, Y. Mori, H. Shinohara and N. Nishi 189 (1994) 117
Quantitative studies of the photoabsorption, photoionization, and ionic photofragmentation of methyl fluoride at VUV and soft X-ray energies (7–250 eV) using dipole electron scattering and synchrotron radiation, T.N. Olney, G. Cooper, W.F. Chan, G.R. Burton, C.E. Brion and K.H. Tan 189 (1994) 733
The dissociative electroionization of C_2H_2, C_2D_2 and C_2HD. Investigation of the $[C_2H(D)]^+$ and $[H(D)]^+$ dissociation channels. The (D)H–C_2H(D) binding energy, M. Davister and R. Locht 189 (1994) 805

Objects

Bulk systems

Gases
Vibrational analysis of low-lying K-shell excited states in H_2O and D_2O calculated by an ab initio multireference CI method, A. Koch and S.D. Peyerimhoff 189 (1994) 67
Temperature dependence of the dipole polarizability of xenon ($^1S_0$) due to dynamic non-resonant Stark effect caused by black-body radiation, U. Hohm and U. Trümper 189 (1994) 443
Three-dimensional wavepacket study of the reaction $OH+H_2 \rightarrow H_2O+H$: a mixed quantal/classical approach, N. Balakrishnan and G.D. Billing 189 (1994) 499
Molecular geometries and energetics of metal-containing systems using an improved ASED-MO model: a systematic test to group 1 and 2 metal containing systems in the gas phase, M.-A.D. Stiakaki, A.C. Tsipis, C.A. Tsipis and C.E. Xanthopoulos 189 (1994) 533
A reaction-path dynamics approach to the thermal unimolecular decomposition of acetaldoxime, K. Okada, M. Sugimoto and K. Saito 189 (1994) 629
Temperature dependent ultraviolet absorption cross sections of 1,3-butadiene and butadiyne, A. Fahr and A.K. Nayak 189 (1994) 725

Inner-shell spectroscopy of compounds containing Si–Si bonds: is there a localised, low-energy Si–Si resonance?, S.G. Urquhart, J.Z. Xiong, A.T. Wen, T.K. Sham, K.M. Baines, G.G.B. de Souza and A.P. Hitchcock 189 (1994) 757
The dissociative electroionization of C_2H_2, C_2D_2 and C_2HD. Investigation of the $[C_2H(D)]^+$ and $[H(D)]^+$ dissociation channels. The (D)H–C_2H(D) binding energy, M. Davister and R. Locht 189 (1994) 805

Supersonic beams
Photofragmentation of chlorobenzene: translational energy distribution of the recoiling Cl fragment, T. Ichimura, Y. Mori, H. Shinohara and N. Nishi 189 (1994) 117

Liquids mixtures and solutions
Excited state properties and deactivation pathways of 7-aminocoumarins, K. Rechthaler and G. Köhler 189 (1994) 99
Multicentric charges for the accurate representation of electrostatic interactions in force-field calculations for small molecules, C. Alemán, M. Orozco and F.J. Luque 189 (1994) 573
Temperature lens and temperature grating in aqueous solution, M. Terazima 189 (1994) 793

Crystals
Adiabatic approximation and non-adiabatic effects for open-shell atoms in an inert solvent: F atoms in solid Kr, A.I. Krylov, R.B. Gerber and V.A. Apkarian 189 (1994) 261

–mixed
Matrix isolated HF: the high-resolution infrared spectrum of a cryogenically solvated hindered rotor, D.T. Anderson and J.S. Winn 189 (1994) 171
Vibrational energy transfer from CO to O_2 in rare gas matrices. I. Vibrational excitation and relaxation of O_2 (X, v=4–20), A. Salloum and H. Dubost 189 (1994) 179
Luminescence of nitrogen and neon atoms isolated in solid helium, R.E. Boltnev, E.B. Gordon, V.V. Khmelenko, I.N. Krushinskaya, M.V. Martynenko, A.A. Pelmenev, E.A. Popov and A.F. Shestakov 189 (1994) 367

Polymers
Energy spectra and magnetic properties of radialenes, dendralenes and their poly-radical ions. A new class of polaronic high-spin π-systems, N. Tyutyulkov, F. Dietz, K. Müllen, M. Baumgarten and S. Karabunarliev 189 (1994) 83
Electron spin resonance in PPV-photodiodes: detection via photoinduced current, V. Dyakonov, N. Gauss, G. Rösler, S. Karg, W. Riess and M. Schwoerer 189 (1994) 687

Semiconductors
Electron spin resonance in PPV-photodiodes: detection via photoinduced current, V. Dyakonov, N. Gauss, G. Rösler, S. Karg, W. Riess and M. Schwoerer 189 (1994) 687

Surfaces
Surface diffusion of the cyclohexadienyl radical adsorbed on silica and on a silica supported Pd catalyst studied by means of ALC-μSR, M. Schwager, H. Dilger, E. Roduner, I.D. Reid, P.W. Percival and A. Baiker 189 (1994) 697

Low-dimensional materials
Ordering of transition metal atoms in $MCuFeS_2$ (M=Li, Na): electronic structure and Monte Carlo simulations, R. Ramirez, A. Buljan, J.C. Noya and J. Llanos 189 (1994) 585

Dielectrics
Multicentric charges for the accurate representation of electrostatic interactions in force-field calculations for small molecules, C. Alemán, M. Orozco and F.J. Luque 189 (1994) 573

Biological systems
Resonance effects on superexchange and sequential electron-transfer reactions due to energy-level crossing, J. Tang 189 (1994) 427
Exchange variation of hyperfine characteristics of tetrameric $[Mn_3(III)Mn(IV)]$ and $[Mn_3(IV)Mn(III)]$ clusters, M.I. Belinskii 189 (1994) 451
Evaluation of the hydrophilic behaviour of a β-casein peptide by molecular dynamics simulation, C.X. Wang, R. Douillard and V. Tran 189 (1994) 511

Microscopic systems

Atoms
O atom photoproduction dynamics and reactions in cryogenic solids, E.T. Ryan and E. Weitz 189 (1994) 293
Spectroscopy and reactive dynamics of atoms trapped in molecular hydrogen matrices, M.E. Fajardo, S. Tam, T.L. Thompson and M.E. Cordonnier 189 (1994) 351
Luminescence of nitrogen and neon atoms isolated in solid helium, R.E. Boltnev, E.B. Gordon, V.V. Khmelenko, I.N. Krushinskaya, M.V. Martynenko, A.A. Pelmenev, E.A. Popov and A.F. Shestakov 189 (1994) 367
Temperature dependence of the dipole polarizability of xenon ($^1S_0$) due to dynamic non-resonant Stark effect caused by black-body radiation, U. Hohm and U. Trümper 189 (1994) 443

Molecules (neutral and ionic)
Reorganization energies in benzene, naphthalene, and anthracene, A. Klimkāns and S. Larsson 189 (1994) 25
Theoretical study of the low-lying electronic states of the BaNa molecule, N. Boutassetta, A.R. Allouche and M. Aubert-Frécon 189 (1994) 33
Structure and optical absorption of oligorylenes upon doping, S. Karabunarliev, L. Gherghel, K.-H. Koch and M. Baumgarten 189 (1994) 53
The vibrational energy levels of small transient molecules isolated in neon and argon matrices, M.E. Jacox 189 (1994) 149
Photogeneration of ionic species in Ar, Kr and Xe matrices doped with HCl, HBr and HI, H.M. Kunttu and J.A. Seetula 189 (1994) 273
Absorption spectra of conjugated hydrocarbon cation chains in neon matrices, P. Freivogel, J. Fulara, D. Lessen, D. Forney and J.P. Maier 189 (1994) 335
Reactions of pulsed-laser evaporated lithium atoms with O_2 and N_2O, L. Andrews, W. Saffell and J.T. Yustein 189 (1994) 343
Spectroscopy and reactive dynamics of atoms trapped in molecular hydrogen matrices, M.E. Fajardo, S. Tam, T.L. Thompson and M.E. Cordonnier 189 (1994) 351
Reliable isotropic and anisotropic dipole properties, and dipolar dispersion energy coefficients, for CO evaluated using constrained dipole oscillator strength techniques, A. Kumar and W.J. Meath 189 (1994) 467

A theoretical study on the ionization of thiophene with analysis of vibrational structure of the photoelectron spectra, K. Takeshita and Y. Yamamoto 189 (1994) 489
Microcanonical rate constant in nonequilibrium distribution of vibrational energy on the basis of Slater's theory of unimolecular reactions, A. Metsala 189 (1994) 637
A theoretical model of laser-control photodissociation of molecules, J.C. Vallet, A.A. Villaeys, J.P. Lavoine and S.H. Lin 189 (1994) 657
Dynamics of selected rovibronic eigenstates in the V system of carbon disulfide $^{12,13}CS_2$, H. Bitto, A. Ružičić and J.R. Huber 189 (1994) 713

–diatomic
Influence of the radiation field onto the photodissociation, M. Rosenberger and J. Hinze 189 (1994) 41
The vibrational energy levels of small transient molecules isolated in neon and argon matrices, M.E. Jacox 189 (1994) 149
Vibrational energy transfer from CO to O_2 in rare gas matrices. I. Vibrational excitation and relaxation of O_2 (X, v=4–20), A. Salloum and H. Dubost 189 (1994) 179
Environmental effects on the energetics and photo-induced dynamics of molecular states, N. Schwentner, C. Bressler, W. Lawrence, J. Xu and M. Chergui 189 (1994) 205
Vibronic relaxation dynamics of CN in Ar matrices and clusters, H.-S. Lin, M.G. Erickson, Y. Lin, W.H. Basinger, W.G. Lawrence and M.C. Heaven 189 (1994) 235
Three-dimensional wavepacket study of the reaction $OH+H_2 \rightarrow H_2O+H$: a mixed quantal/classical approach, N. Balakrishnan and G.D. Billing 189 (1994) 499
Molecular geometries and energetics of metal-containing systems using an improved ASED-MO model: a systematic test to group 1 and 2 metal containing systems in the gas phase, M.-A.D. Stiakaki, A.C. Tsipis, C.A. Tsipis and C.E. Xanthopoulos 189 (1994) 533
Probabilities of rotational transitions under ionization into N_2^+ ($B\,^2\Sigma_u^+$, $v'=0$) state by electron impact, G.I. Sukhinin, R.G. Sharafutdinov, A.E. Belikov and A.I. Sedelnikov 189 (1994) 603
Computation of time-dependent transition probabilities in excimer molecules induced by femtosecond laser pulses, I.D. Petsalakis, T. Mercouris and C.A. Nicolaides 189 (1994) 615
Selective detection of $O(^1S)$ and $CO(a\,^3\Pi)$ following electron impact on CO using solid xenon, L.R. LeClair, M.D. Brown and J.W. McConkey 189 (1994) 769

–small polyatomics
Second-order perturbation theory using correlated orbitals. I. Full-valence reference functions, O. Parisel and Y. Ellinger 189 (1994) 1
Vibrational analysis of low-lying K-shell excited states in H_2O and D_2O calculated by an ab initio multireference CI method, A. Koch and S.D. Peyerimhoff 189 (1994) 67
The vibrational energy levels of small transient molecules isolated in neon and argon matrices, M.E. Jacox 189 (1994) 149
Matrix isolation FTIR and ab initio study of complexes between formic acid and nitrogen, J. Lundell, M. Räsänen and Z. Latajka 189 (1994) 245
Photogeneration of ionic species in Ar, Kr and Xe matrices doped with HCl, HBr and HI, H.M. Kunttu and J.A. Seetula 189 (1994) 273
Photolysis of ozone and reactions of $O(^1D)$ atoms in solid nitrogen, A.V. Benderskii and C.A. Wight 189 (1994) 307
ESR spectra, structure and photochemistry of carboxylic acid and ester anions: matrix isolation study, R. Köppe and P.H. Kasai 189 (1994) 401

Quantitative studies of the photoabsorption, photoionization, and ionic photofragmentation of methyl fluoride at VUV and soft X-ray energies (7–250 eV) using dipole electron scattering and synchrotron radiation, T.N. Olney, G. Cooper, W.F. Chan, G.R. Burton, C.E. Brion and K.H. Tan 189 (1994) 733

The vibrational deactivation of the (00^01) and (01^10). Modes of CO_2 measured down to 140 K, R.M. Siddles, G.J. Wilson and C.J.S.M. Simpson 189 (1994) 779

The dissociative electroionization of C_2H_2, C_2D_2 and C_2HD. Investigation of the $[C_2H(D)]^+$ and $[H(D)]^+$ dissociation channels. The (D)H–C_2H(D) binding energy, M. Davister and R. Locht 189 (1994) 805

–aromatics

Reorganization energies in benzene, naphthalene, and anthracene, A. Klimkāns and S. Larsson 189 (1994) 25

Excited state properties and deactivation pathways of 7-aminocoumarins, K. Rechthaler and G. Köhler 189 (1994) 99

Photofragmentation of chlorobenzene: translational energy distribution of the recoiling Cl fragment, T. Ichimura, Y. Mori, H. Shinohara and N. Nishi 189 (1994) 117

Intensity distribution in the fluorescence low-frequency mode progressions of the "slightly" asymmetric hydrogen bonded AHB fragment, M.V. Vener 189 (1994) 593

–other large

Rare gas matrix studies of absorption and fluorescence of reactive intermediates formed in discharges through acetylene, A.M. Smith, J. Agreiter, M. Härtle, C. Engel and V.E. Bondybey 189 (1994) 315

Inner-shell spectroscopy of compounds containing Si–Si bonds: is there a localised, low-energy Si–Si resonance?, S.G. Urquhart, J.Z. Xiong, A.T. Wen, T.K. Sham, K.M. Baines, G.G.B. de Souza and A.P. Hitchcock 189 (1994) 757

Molecular aggregates

Detection of trimethylenemethane by IR spectroscopy: result of the photoisomerization of methylenecyclopropane in a halogen-doped xenon matrix, G. Maier, D. Jürgen, R. Tross, H.P. Reisenauer, B.A. Hess Jr. and L.J. Schaad 189 (1994) 383

–dimers

Electronically induced defect formation in Xe-doped solid Kr, E.V. Savchenko, A.N. Ogurtsov, O.N. Grigorashchenko and S.A. Gubin 189 (1994) 415

–van der Waals molecules

Vibronic spectra of the matrix-isolated van der Waals complexes NH·N_2 and NH·CO, M. Maas, Ch. Gross and U. Schurath 189 (1994) 217

Reliable isotropic and anisotropic dipole properties, and dipolar dispersion energy coefficients, for CO evaluated using constrained dipole oscillator strength techniques, A. Kumar and W.J. Meath 189 (1994) 467

–clusters

Matrix isolated HF: the high-resolution infrared spectrum of a cryogenically solvated hindered rotor, D.T. Anderson and J.S. Winn 189 (1994) 171

Vibronic relaxation dynamics of CN in Ar matrices and clusters, H.-S. Lin, M.G. Erickson, Y. Lin, W.H. Basinger, W.G. Lawrence and M.C. Heaven 189 (1994) 235
Exchange variation of hyperfine characteristics of tetrameric [Mn_3(III)Mn(IV)] and [Mn_3(IV)Mn(III)] clusters, M.I. Belinskii 189 (1994) 451

–complexes
Molecular geometries and energetics of mono- and biligated group 2 metal monopositive ions using an improved ASED-MO model, E.G. Bakalbassis and C.A. Tsipis 189 (1994) 557

Free radicals (including hydronium and muonium)
Second-order perturbation theory using correlated orbitals. I. Full-valence reference functions, O. Parisel and Y. Ellinger 189 (1994) 1
The vibrational energy levels of small transient molecules isolated in neon and argon matrices, M.E. Jacox 189 (1994) 149
Spectroscopy and reactive dynamics of atoms trapped in molecular hydrogen matrices, M.E. Fajardo, S. Tam, T.L. Thompson and M.E. Cordonnier 189 (1994) 351
ESR spectra, structure and photochemistry of carboxylic acid and ester anions: matrix isolation study, R. Köppe and P.H. Kasai 189 (1994) 401
Magnetic field dependent yield of geminate radical pair recombination in micelles. Test of the Johnson–Merrifield approximation, J.B. Pedersen, A.I. Shushin and J.S. Jørgensen 189 (1994) 479
Surface diffusion of the cyclohexadienyl radical adsorbed on silica and on a silica supported Pd catalyst studied by means of ALC-μSR, M. Schwager, H. Dilger, E. Roduner, I.D. Reid, P.W. Percival and A. Baiker 189 (1994) 697

Defects and impurities
Zero-phonon line as the foundation stone of high-resolution matrix spectroscopy, persistent spectral hole burning, single impurity molecule spectroscopy, K.K. Rebane 189 (1994) 139
Adiabatic approximation and non-adiabatic effects for open-shell atoms in an inert solvent: F atoms in solid Kr, A.I. Krylov, R.B. Gerber and V.A. Apkarian 189 (1994) 261
Spectroscopy and reactive dynamics of atoms trapped in molecular hydrogen matrices, M.E. Fajardo, S. Tam, T.L. Thompson and M.E. Cordonnier 189 (1994) 351
Electronically induced defect formation in Xe-doped solid Kr, E.V. Savchenko, A.N. Ogurtsov, O.N. Grigorashchenko and S.A. Gubin 189 (1994) 415

Ions and charge carriers
Absorption spectra of conjugated hydrocarbon cation chains in neon matrices, P. Freivogel, J. Fulara, D. Lessen, D. Forney and J.P. Maier 189 (1994) 335

Phenomena

Molecular structure
Structure and optical absorption of oligorylenes upon doping, S. Karabunarliev, L. Gherghel, K.-H. Koch and M. Baumgarten 189 (1994) 53
ESR spectra, structure and photochemistry of carboxylic acid and ester anions: matrix isolation study, R. Köppe and P.H. Kasai 189 (1994) 401

Molecular geometries and energetics of metal-containing systems using an improved ASED-MO model: a systematic test to group 1 and 2 metal containing systems in the gas phase, M.-A.D. Stiakaki, A.C. Tsipis, C.A. Tsipis and C.E. Xanthopoulos 189 (1994) 533

Vibrations and rotations of molecules

Matrix isolated HF: the high-resolution infrared spectrum of a cryogenically solvated hindered rotor, D.T. Anderson and J.S. Winn 189 (1994) 171
Rare gas matrix studies of absorption and fluorescence of reactive intermediates formed in discharges through acetylene, A.M. Smith, J. Agreiter, M. Härtle, C. Engel and V.E. Bondybey 189 (1994) 315
Reactions of pulsed-laser evaporated lithium atoms with O_2 and N_2O, L. Andrews, W. Saffell and J.T. Yustein 189 (1994) 343
A theoretical study on the ionization of thiophene with analysis of vibrational structure of the photoelectron spectra, K. Takeshita and Y. Yamamoto 189 (1994) 489
Intensity distribution in the fluorescence low-frequency mode progressions of the "slightly" asymmetric hydrogen bonded AHB fragment, M.V. Vener 189 (1994) 593
Probabilities of rotational transitions under ionization into N_2^+ ($B\,^2\Sigma_u^+$, $v'=0$) state by electron impact, G.I. Sukhinin, R.G. Sharafutdinov, A.E. Belikov and A.I. Sedelnikov 189 (1994) 603
Microcanonical rate constant in nonequilibrium distribution of vibrational energy on the basis of Slater's theory of unimolecular reactions, A. Metsala 189 (1994) 637
The vibrational deactivation of the (00^01) and (01^10). Modes of CO_2 measured down to 140 K, R.M. Siddles, G.J. Wilson and C.J.S.M. Simpson 189 (1994) 779

Electronic structure and states

Second-order perturbation theory using correlated orbitals. I. Full-valence reference functions, O. Parisel and Y. Ellinger 189 (1994) 1
Theoretical study of the low-lying electronic states of the BaNa molecule, N. Boutassetta, A.R. Allouche and M. Aubert-Frécon 189 (1994) 33
Excited state properties and deactivation pathways of 7-aminocoumarins, K. Rechthaler and G. Köhler 189 (1994) 99
Absorption spectra of conjugated hydrocarbon cation chains in neon matrices, P. Freivogel, J. Fulara, D. Lessen, D. Forney and J.P. Maier 189 (1994) 335
Luminescence of nitrogen and neon atoms isolated in solid helium, R.E. Boltnev, E.B. Gordon, V.V. Khmelenko, I.N. Krushinskaya, M.V. Martynenko, A.A. Pelmenev, E.A. Popov and A.F. Shestakov 189 (1994) 367
Temperature dependence of the dipole polarizability of xenon ($^1S_0$) due to dynamic non-resonant Stark effect caused by black-body radiation, U. Hohm and U. Trümper 189 (1994) 443
Molecular geometries and energetics of metal-containing systems using an improved ASED-MO model: a systematic test to group 1 and 2 metal containing systems in the gas phase, M.-A.D. Stiakaki, A.C. Tsipis, C.A. Tsipis and C.E. Xanthopoulos 189 (1994) 533
Molecular geometries and energetics of mono- and biligated group 2 metal monopositive ions using an improved ASED-MO model, E.G. Bakalbassis and C.A. Tsipis 189 (1994) 557
Ordering of transition metal atoms in $MCuFeS_2$ (M=Li, Na): electronic structure and Monte Carlo simulations, R. Ramirez, A. Buljan, J.C. Noya and J. Llanos 189 (1994) 585
Inner-shell spectroscopy of compounds containing Si–Si bonds: is there a localised, low-energy Si–Si resonance?, S.G. Urquhart, J.Z. Xiong, A.T. Wen, T.K. Sham, K.M. Baines, G.G.B. de Souza and A.P. Hitchcock 189 (1994) 757

Selective detection of O(^{1}S) and CO(a $^3\Pi$) following electron impact on CO using solid xenon, L.R. LeClair, M.D. Brown and J.W. McConkey 189 (1994) 769

Electric and magnetic properties

Energy spectra and magnetic properties of radialenes, dendralenes and their poly-radical ions. A new class of polaronic high-spin π-systems, N. Tyutyulkov, F. Dietz, K. Müllen, M. Baumgarten and S. Karabunarliev 189 (1994) 83

Temperature dependence of the dipole polarizability of xenon ($^1S_0$) due to dynamic non-resonant Stark effect caused by black-body radiation, U. Hohm and U. Trümper 189 (1994) 443

Reliable isotropic and anisotropic dipole properties, and dipolar dispersion energy coefficients, for CO evaluated using constrained dipole oscillator strength techniques, A. Kumar and W.J. Meath 189 (1994) 467

Electron spin resonance in PPV-photodiodes: detection via photoinduced current, V. Dyakonov, N. Gauss, G. Rösler, S. Karg, W. Riess and M. Schwoerer 189 (1994) 687

Spin splittings

Exchange variation of hyperfine characteristics of tetrameric [Mn_3(III)Mn(IV)] and [Mn_3(IV)Mn(III)] clusters, M.I. Belinskii 189 (1994) 451

Molecular interactions

Environmental effects on the energetics and photo-induced dynamics of molecular states, N. Schwentner, C. Bressler, W. Lawrence, J. Xu and M. Chergui 189 (1994) 205

Vibronic spectra of the matrix-isolated van der Waals complexes NH·N_2 and NH·CO, M. Maas, Ch. Gross and U. Schurath 189 (1994) 217

Matrix isolation FTIR and ab initio study of complexes between formic acid and nitrogen, J. Lundell, M. Räsänen and Z. Latajka 189 (1994) 245

Reliable isotropic and anisotropic dipole properties, and dipolar dispersion energy coefficients, for CO evaluated using constrained dipole oscillator strength techniques, A. Kumar and W.J. Meath 189 (1994) 467

Evaluation of the hydrophilic behaviour of a β-casein peptide by molecular dynamics simulation, C.X. Wang, R. Douillard and V. Tran 189 (1994) 511

Spectral bandshapes and intensities

Structure and optical absorption of oligorylenes upon doping, S. Karabunarliev, L. Gherghel, K.-H. Koch and M. Baumgarten 189 (1994) 53

Zero-phonon line as the foundation stone of high-resolution matrix spectroscopy, persistent spectral hole burning, single impurity molecule spectroscopy, K.K. Rebane 189 (1994) 139

Vibronic spectra of the matrix-isolated van der Waals complexes NH·N_2 and NH·CO, M. Maas, Ch. Gross and U. Schurath 189 (1994) 217

Quantitative studies of the photoabsorption, photoionization, and ionic photofragmentation of methyl fluoride at VUV and soft X-ray energies (7–250 eV) using dipole electron scattering and synchrotron radiation, T.N. Olney, G. Cooper, W.F. Chan, G.R. Burton, C.E. Brion and K.H. Tan 189 (1994) 733

Coupling of electronic and nuclear motion

Reorganization energies in benzene, naphthalene, and anthracene, A. Klimkāns and S. Larsson 189 (1994) 25

Vibronic relaxation dynamics of CN in Ar matrices and clusters, H.-S. Lin, M.G. Erickson, Y. Lin, W.H. Basinger, W.G. Lawrence and M.C. Heaven 189 (1994) 235
Adiabatic approximation and non-adiabatic effects for open-shell atoms in an inert solvent: F atoms in solid Kr, A.I. Krylov, R.B. Gerber and V.A. Apkarian 189 (1994) 261

Energy transfer processes
Vibrational energy transfer from CO to O_2 in rare gas matrices. I. Vibrational excitation and relaxation of O_2 (X, v=4–20), A. Salloum and H. Dubost 189 (1994) 179
Detection of trimethylenemethane by IR spectroscopy: result of the photoisomerization of methylenecyclopropane in a halogen-doped xenon matrix, G. Maier, D. Jürgen, R. Tross, H.P. Reisenauer, B.A. Hess Jr. and L.J. Schaad 189 (1994) 383
Electronically induced defect formation in Xe-doped solid Kr, E.V. Savchenko, A.N. Ogurtsov, O.N. Grigorashchenko and S.A. Gubin 189 (1994) 415
Resonance effects on superexchange and sequential electron-transfer reactions due to energy-level crossing, J. Tang 189 (1994) 427
Quantum corrections to the classical path equations: the higher order correction terms, G.D. Billing 189 (1994) 523
Multicentric charges for the accurate representation of electrostatic interactions in force-field calculations for small molecules, C. Alemán, M. Orozco and F.J. Luque 189 (1994) 573
Selective detection of $O(^1S)$ and $CO(a\,^3\Pi)$ following electron impact on CO using solid xenon, L.R. LeClair, M.D. Brown and J.W. McConkey 189 (1994) 769

Molecular photophysical processes
Zero-phonon line as the foundation stone of high-resolution matrix spectroscopy, persistent spectral hole burning, single impurity molecule spectroscopy, K.K. Rebane 189 (1994) 139
Exchange variation of hyperfine characteristics of tetrameric $[Mn_3(III)Mn(IV)]$ and $[Mn_3(IV)Mn(III)]$ clusters, M.I. Belinskii 189 (1994) 451
Computation of time-dependent transition probabilities in excimer molecules induced by femtosecond laser pulses, I.D. Petsalakis, T. Mercouris and C.A. Nicolaides 189 (1994) 615
A theoretical model of laser-control photodissociation of molecules, J.C. Vallet, A.A. Villaeys, J.P. Lavoine and S.H. Lin 189 (1994) 657
Temperature dependent ultraviolet absorption cross sections of 1,3-butadiene and butadiyne, A. Fahr and A.K. Nayak 189 (1994) 725

Intramolecular dynamics
Dynamics of selected rovibronic eigenstates in the V system of carbon disulfide $^{12,13}CS_2$, H. Bitto, A. Ružičić and J.R. Huber 189 (1994) 713

–vibrational energy redistribution (including vibrational dissociation)
Vibrational analysis of low-lying K-shell excited states in H_2O and D_2O calculated by an ab initio multireference CI method, A. Koch and S.D. Peyerimhoff 189 (1994) 67
Detection of trimethylenemethane by IR spectroscopy: result of the photoisomerization of methylenecyclopropane in a halogen-doped xenon matrix, G. Maier, D. Jürgen, R. Tross, H.P. Reisenauer, B.A. Hess Jr. and L.J. Schaad 189 (1994) 383
Microcanonical rate constant in nonequilibrium distribution of vibrational energy on the basis of Slater's theory of unimolecular reactions, A. Metsala 189 (1994) 637

Luminescence spectra, yields and lifetimes
Electron spin resonance in PPV-photodiodes: detection via photoinduced current, V. Dyakonov, N. Gauss, G. Rösler, S. Karg, W. Riess and M. Schwoerer 189 (1994) 687

Multiphoton phenomena
Influence of the radiation field onto the photodissociation, M. Rosenberger and J. Hinze 189 (1994) 41
A theoretical model of laser-control photodissociation of molecules, J.C. Vallet, A.A. Villaeys, J.P. Lavoine and S.H. Lin 189 (1994) 657

Reactions (including dissociation)
Influence of the radiation field onto the photodissociation, M. Rosenberger and J. Hinze 189 (1994) 41
Vibrational analysis of low-lying K-shell excited states in H_2O and D_2O calculated by an ab initio multireference CI method, A. Koch and S.D. Peyerimhoff 189 (1994) 67
Magnetic field dependent yield of geminate radical pair recombination in micelles. Test of the Johnson–Merrifield approximation, J.B. Pedersen, A.I. Shushin and J.S. Jørgensen 189 (1994) 479
Microcanonical rate constant in nonequilibrium distribution of vibrational energy on the basis of Slater's theory of unimolecular reactions, A. Metsala 189 (1994) 637
A theoretical model of laser-control photodissociation of molecules, J.C. Vallet, A.A. Villaeys, J.P. Lavoine and S.H. Lin 189 (1994) 657

–gas phase
Three-dimensional wavepacket study of the reaction $OH+H_2 \rightarrow H_2O+H$: a mixed quantal/classical approach, N. Balakrishnan and G.D. Billing 189 (1994) 499
Molecular geometries and energetics of mono- and biligated group 2 metal monopositive ions using an improved ASED-MO model, E.G. Bakalbassis and C.A. Tsipis 189 (1994) 557
A reaction-path dynamics approach to the thermal unimolecular decomposition of acetaldoxime, K. Okada, M. Sugimoto and K. Saito 189 (1994) 629
Product energy distributions and angular momentum disposal in heavy–heavy–light reactions via the CPOAM model, M. Albertí, X. Giménez and A. Aguilar 189 (1994) 677
The dissociative electroionization of C_2H_2, C_2D_2 and C_2HD. Investigation of the $[C_2H(D)]^+$ and $[H(D)]^+$ dissociation channels. The (D)H–C_2H(D) binding energy, M. Davister and R. Locht 189 (1994) 805

–condensed phase
Environmental effects on the energetics and photo-induced dynamics of molecular states, N. Schwentner, C. Bressler, W. Lawrence, J. Xu and M. Chergui 189 (1994) 205
Photogeneration of ionic species in Ar, Kr and Xe matrices doped with HCl, HBr and HI, H.M. Kunttu and J.A. Seetula 189 (1994) 273
O atom photoproduction dynamics and reactions in cryogenic solids, E.T. Ryan and E. Weitz 189 (1994) 293
Multicentric charges for the accurate representation of electrostatic interactions in force-field calculations for small molecules, C. Alemán, M. Orozco and F.J. Luque 189 (1994) 573

–photochemical
Photofragmentation of chlorobenzene: translational energy distribution of the recoiling Cl fragment, T. Ichimura, Y. Mori, H. Shinohara and N. Nishi 189 (1994) 117
Photolysis of ozone and reactions of $O(^1D)$ atoms in solid nitrogen, A.V. Benderskii and C.A. Wight 189 (1994) 307

ESR spectra, structure and photochemistry of carboxylic acid and ester anions: matrix isolation study, R. Köppe and P.H. Kasai 189 (1994) 401
Computation of time-dependent transition probabilities in excimer molecules induced by femtosecond laser pulses, I.D. Petsalakis, T. Mercouris and C.A. Nicolaides 189 (1994) 615

Tunneling
Intensity distribution in the fluorescence low-frequency mode progressions of the "slightly" asymmetric hydrogen bonded AHB fragment, M.V. Vener 189 (1994) 593

Electron transfer
Reorganization energies in benzene, naphthalene, and anthracene, A. Klimkāns and S. Larsson 189 (1994) 25
Excited state properties and deactivation pathways of 7-aminocoumarins, K. Rechthaler and G. Köhler 189 (1994) 99
Resonance effects on superexchange and sequential electron-transfer reactions due to energy-level crossing, J. Tang 189 (1994) 427

Ionization (including Rydberg states)
A theoretical study on the ionization of thiophene with analysis of vibrational structure of the photoelectron spectra, K. Takeshita and Y. Yamamoto 189 (1994) 489
The dissociative electroionization of C_2H_2, C_2D_2 and C_2HD. Investigation of the $[C_2H(D)]^+$ and $[H(D)]^+$ dissociation channels. The $(D)H–C_2H(D)$ binding energy, M. Davister and R. Locht 189 (1994) 805

Molecular motion (including diffusive)
A molecular dynamics simulation of the plastic phase (I) of cyclopentane, G. Cardini, M. Ricci, R. Righini and S. Califano 189 (1994) 17
Magnetic field dependent yield of geminate radical pair recombination in micelles. Test of the Johnson–Merrifield approximation, J.B. Pedersen, A.I. Shushin and J.S. Jørgensen 189 (1994) 479
Evaluation of the hydrophilic behaviour of a β-casein peptide by molecular dynamics simulation, C.X. Wang, R. Douillard and V. Tran 189 (1994) 511
Surface diffusion of the cyclohexadienyl radical adsorbed on silica and on a silica supported Pd catalyst studied by means of ALC-μSR, M. Schwager, H. Dilger, E. Roduner, I.D. Reid, P.W. Percival and A. Baiker 189 (1994) 697

Surface effects and catalysis
Surface diffusion of the cyclohexadienyl radical adsorbed on silica and on a silica supported Pd catalyst studied by means of ALC-μSR, M. Schwager, H. Dilger, E. Roduner, I.D. Reid, P.W. Percival and A. Baiker 189 (1994) 697

Thermodynamic and transport properties
Temperature lens and temperature grating in aqueous solution, M. Terazima 189 (1994) 793

Structure of solids and liquids
Matrix isolated HF: the high-resolution infrared spectrum of a cryogenically solvated hindered rotor, D.T. Anderson and J.S. Winn 189 (1994) 171
Electronically induced defect formation in Xe-doped solid Kr, E.V. Savchenko, A.N. Ogurtsov, O.N. Grigorashchenko and S.A. Gubin 189 (1994) 415

Ordering of transition metal atoms in $MCuFeS_2$ (M=Li, Na): electronic structure and Monte Carlo simulations, R. Ramirez, A. Buljan, J.C. Noya and J. Llanos 189 (1994) 585
